

Kenedy ISD
School Health Advisory Council
03/28/19

A campus compliance evaluation was done for each campus and the results were shared with the council. The district did well overall following our district wellness policy. Only a few items were removed from the snacks sold at the cafeteria because they did not meet the Smart Snacks requirements.

Ms. Brown requested that we do a survey and share the results with her so she could have some feedback on how the cafeteria is doing. Middle school staff was selected for the survey.

There is a company that distributes healthy information in letters that goes out to parents with fun games for kids. The subscription would cost the district \$349.00 for 9 issues. The council discussed the issue and Ms. Brown offered to put healthy information/fun activities for students on the menu that goes out to parents and students. She said that she was able to get the information for free and it would not cost the district. The council decided to go that route.

The last topic of discussion was health and wellness day for our students and staff. We decided to do it again this year. Suggestions were made for possible speakers depending on who was available and what days we had left on our calendar. Kellie Kolodziej would reach out to individuals and make arrangements.
