

Kenedy ISD
School Health Advisory Council
01/10/19

The council had a follow-up discussion about the cafeteria issues. Reports from staff have been positive about the flow of students through the cafeteria. They are getting plenty of time to eat. The availability of choices at the secondary campus has improved.

The next item of discussion was concerning human sexuality education. In the past, we have used the program adopted by the Texas Department of State Health Services. Monica Gwosdz was our local Health Department nurse and she would do the training for us. She has resigned, but has offered to continue to do the class for the school district. Our other option was to hire another company like Aim for Success to hold a program for the students. The SHAC voted to utilize Monica and stick with Big Decisions.
