

Kenedy ISD
School Health Advisory Council Minutes
11/01/18

Introductions of members were made and the role of the Council was explained to new members.

First item of discussion was the flow of the cafeteria. Several teachers were concerned that their students were not getting enough time to eat because the flow of the students through the cafeteria line was slow. The council came up with several ideas, but ultimately decided on teachers e-mailing their lunch orders to the cafeteria in the morning. The teachers will also work with their students to help them memorize their lunch numbers.

Another cafeteria concern was brought up regarding our secondary campus. Teachers and parents are voicing concern about running out of food choices for certain grades. One suggestion was to make more of the most popular items so they won't run out.

Due to an increase in the number of flu cases, the SHAC voted to put out a letter to parents. We also discussed meeting with a consultant from Hotsy Carlson Equipment Co to evaluate a disinfectant sanitizer called VitalOxide
